

## Features

- ◆ Graphical user interface with touch panel for BACnet networks
- ◆ Fully compliant with ANSI/ASHRAE-135-2004 and ISO 16484-5 standard
- ◆ 12.1": 800x600 (SVGA) color TFT display
- ◆ 15": 1024x768 (XGA) color TFT display
- ◆ Dimmable backlight, 65535 colors
- ◆ Representation of user defined graphics, numbers, text, bar charts, trend logs, and bitmaps
- ◆ Visualization and control of individual data points (Objects)
- ◆ Supports Alarming, Scheduling, and Trending; locally and by referring to remote BACnet schedule, and notification objects
- ◆ Supports common mathematical operations and functions as well as Boolean expressions
- ◆ Event-driven e-mail notification
- ◆ Remote access via the VNC (Virtual Network Computing) protocol
- ◆ Access control with PIN code
- ◆ Embedded Webserver for device configuration and data point listing
- ◆ Simple, graphical programming with L-VIS configuration software supplied with the unit
- ◆ WYSIWYG preview on PC screen
- ◆ B-AAC (and in addition COV, Trending)
- ◆ Up to 512 BACnet server objects
- ◆ BACnet client configuration with L-VIS configuration software (scan and EDE import)
- ◆ BACnet client functions (WriteProperty, ReadProperty, COV Subscription)
- ◆ Supports BACnet/IP or BACnet MS/TP
- ◆ 2 Ethernet ports for device daisy-chaining with integrated Ethernet switch
- ◆ Wireless LAN 802.11bg through external USB WLAN adapter
- ◆ 2 x USB-A connectors for expansions
- ◆ Audio output with integrated stereo speakers, e.g. for alarm text announcement
- ◆ Connector for external temperature sensor (L-TEMP)
- ◆ 2 Digital Inputs
- ◆ 200 Megabyte Flash for project / data storage
- ◆ Aluminium frame with anodized finish
- ◆ Flush-mounting in combination with wall mounting box (LVIS-FRAME12, LVIS-FRAME15)
- ◆ International protection rating:  
Front: IP54 / Back: IP10
- ◆ Dimensions (12.1", LVIS-ME212):  
W = 329 mm, H = 268.3 mm, D = 65 mm
- ◆ Dimensions (15", LVIS-ME215):  
W = 394 mm, H = 318.0 mm, D = 65 mm

- ◆ Supply Voltage: 24 V DC  $\pm 10\%$ , or 90-265 V AC
- ◆ Ultra Low Power Consumption:
  - 2.5 W Display off
  - 13 W Display on (12.1", LVIS-ME212)
  - 16 W Display on (15", LVIS-ME215)
- ◆ Backlight Lifetime: 50000 hours

## Description

L-VIS impresses with its timeless design, harmonic integration into modern and historical architecture as well as its extremely user friendly concept. The powerful platform of the 12.1" (LVIS-ME212) and 15" (LVIS-ME215) version of the L-VIS touch panels leaves nothing to be desired.

Primarily any information from a BACnet network can be displayed or controlled by the touch panel. Binary, analog, or multi-state objects (input, output, value) represent the interface to the BACnet network.

The graphical interface can easily be adapted by using customized and detailed images or graphics in common file formats (\*.JPG, \*.BMP, \*.TIF, etc. and even animated \*.GIF).

Order Number	Configuration
LVIS-ME212	12.1" Touch Panel 2 x Ethernet, integrated switch 1 x BACnet MS/TP
LVIS-FRAME12	Mounting frame (12.1" model)
LVIS-ME215	15" Touch Panel 2 x Ethernet, integrated switch 1 x BACnet MS/TP
LVIS-FRAME15	Mounting frame (15" model)
L-TEMP	External Temperature Sensor

Any Information can be displayed in various ways. Dynamic information is shown as numerical values, changing icons, bar graphs or text.

L-VIS supports basic automation functions such as scheduling, alarming, and trending. This includes a local scheduling service as well as the possibility to configure several local and remote 24 hour schedulers through display elements. Thus L-VIS has the capacity to run as a standalone device or to interact with other L-VIS devices.

L-VIS also provides functionality to generate, deliver, acknowledge, and display alarm conditions and logs. Logged information is available through CSV file export.

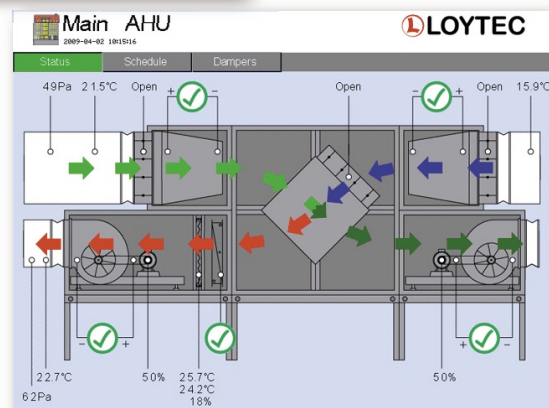

The trending capability includes trend graphs, a data log of values and time stamps and transferring the recorded data to a host PC for analysis and for storage. Another helpful feature is the automatic transfer from the L-VIS recorded data to a preset destination.

Furthermore L-VIS supports common mathematical operations and functions, as well as boolean expressions.

L-VIS supports event-driven e-mail notification as a result of a predefined action triggered by a specific status or an exceeded high limit.

### L-VIS Application Example

Fields of application are various. The 12.1" and 15" touch panel allows visualizing HVAC systems clearly arranged for local operation. They host graphics in a building automation system avoiding the use of PC hardware. Naturally the L-VIS touch panel can be the user interface in a representative conference room.

## Connectivity

The L-VIS can be connected to a BACnet MS/TP channel or a BACnet/IP (Ethernet) channel. Two Ethernet ports for device daisy-chaining with an integrated Ethernet switch are available. The 12.1" and 15" L-VIS touch panel can be made wireless by the use of an external USB WLAN adapter (802.11bg).

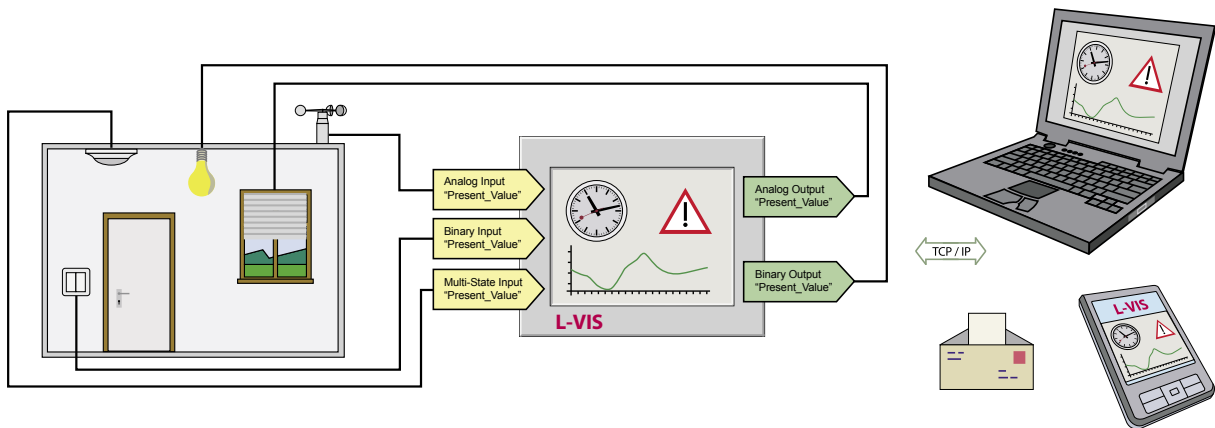

Firmware upgrade and device configuration can be done via an Ethernet connection.

## Remote Access and E-mail Notification

Remote access is supported via TCP/IP through an integrated VNC (Virtual Network Computing) server. The content of the L-VIS touch panel can be brought to a PC or PDA using the VNC protocol. Since VNC is platform independent, VNC viewers are available for several operating systems.

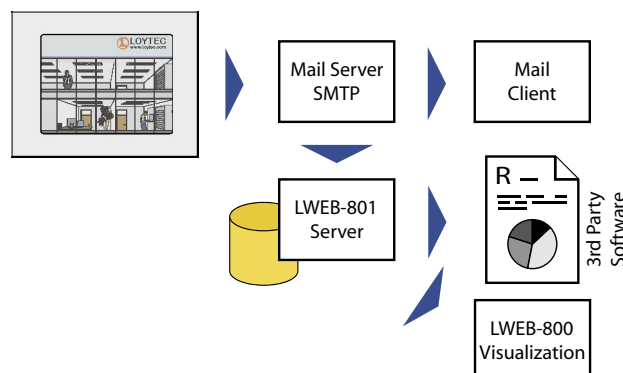

L-VIS features event-driven e-mail notifications with predefined actions. Individuals are promptly informed about an abnormal status. Trend data are forwarded as an e-mail attachment, e.g. for LWEB-801 Server.

## Data Storage

The L-VIS touch panel can store historical data on the device. The data can be read from the devices via a FTP connection as CSV files.

L-VIS touch panels can automatically send e-mails with a CSV attachment to a mail server. The LWEB-801 Server polls e-mails with a CSV attachment from this mail server. Data from the CSV files are automatically extracted and stored in the SQL database. LWEB-801 recognizes duplicate data and ensures that the same data will not be stored repeatedly.

## Easy Configuration

Easy configuration is guaranteed with the L-VIS configuration software supplied with the unit.

An object-oriented configuration of the graphical interface with WYSIWYG preview and predefined functions make it easy and efficient to create a pleasing graphical interface. With the UCS-16 character set of the Unicode standard (ISO 10646), any language, including Chinese, Japanese, and Korean (CJK) is supported.

## Dimensions

All Dimensions are in millimeter (mm).

DIM	12.1"	15"
A	329	394
B	268.3	318
C	4	4
D	61	61
E	249	293.7
F	299	353
G	246	304.4
H	185.3	228.25
